(*) For the weeks, the first value gives the arithmetic mean, the second value (after the slash) the median.

Over the whole year of 2019, 133.309 downloads of single articles were counted for the online edition of the journal Archäologische Informationen. The journal is the most frequently read academic journal in the field of archaeology from those hosted by "Propylaeum" / University Library of Heidelberg. The graph (below) is based on the formal download counting by Propylaeum, with Archäologische Informationen having a share of 22,3 % of these 13 journals.
